

Bits

Sequence logo for position 9. The y-axis represents information content in bits, ranging from 0.0 to 1.5. The x-axis shows positions 1 through 9. At position 9, there is a prominent black bar reaching approximately 1.3 bits, with a black 'L' overlaid. The 'L' is at the top of the bar. The rest of the sequence (positions 1-8) shows very low conservation, with bars near the 0.0 baseline.

Position	Conserved Residues (approx. bits)
1	Low conservation (bits < 0.2)
2	High conservation (bits > 3.0), dominated by D and Q
3	Low conservation (bits < 0.2)
4	Low conservation (bits < 0.2)
5	Low conservation (bits < 0.2)
6	Low conservation (bits < 0.2)
7	Low conservation (bits < 0.2)
8	Low conservation (bits < 0.2)
9	High conservation (bits > 1.0), dominated by L
